

Conditions of Entry to Stadium (RVT¹)

Only visitors, who meet the i.e. RVT conditions, are allowed to enter the match:

1. **a negative PCR test** provided that no more than 72 hours have passed since the swab was taken, or **a negative rapid antigen test** provided that no more than 48 hours have passed since the swab was taken,
2. **EU Digital COVID Certificate** in digital or paper format and with a QR code (**EU DCC**),
3. **a digital COVID certificate of a third country** in digital or paper format and with a QR code, which must contain the same data as the EU DCC and be issued in English by a competent health authority of the third country (DCC of a third country),
4. **a certificate of COVID-19 vaccination** to show that the person has received:
 - the second dose of the Comirnaty vaccine produced by Biontech/Pfizer or the Spikevax COVID-19 vaccine produced by Moderna or the Sputnik V vaccine produced by Russia's Gamaleya National Centre of Epidemiology and Microbiology or the CoronaVac vaccine produced by Sinovac Biotech or the COVID-19 vaccine produced by Sinopharm or the Vaxzevria COVID-19 vaccine produced by AstraZeneca or the Covishield produced by the Serum Institute of India/or a combination of two previously listed vaccines*;
 - the first dose of the Janssen COVID-19 vaccine produced by Johnson and Johnson/Janssen-Cilag. Proof of vaccination is obtained as of the day of vaccination.
5. **a certificate of a positive PCR test result** that is older than 10 days, unless a doctor determines otherwise, but not older than 240 days;
6. **proof of recovery from COVID-19 referred to in the preceding point and proof of vaccination against COVID-19 to show that the person has received one dose of a vaccine** under indent one of point 4 within a period of no more than 240 days since receiving a positive PCR test result or from the onset of symptoms; The person is protected as of the day of vaccination.

* Until 12 September 2021, a person is considered to have fulfilled the recovered/vaccinated/tested rule if he or she provides proof that at least 21 days have elapsed since receiving the first dose of the Vaxzevria COVID-19 vaccine produced by AstraZeneca or the Covishield vaccine produced by the Serum Institute of India/AstraZeneca.

¹ RVT condition stands for Recovered, Vaccinated, Tested

A **PCR test** or **rapid antigen test** is deemed to be valid if performed in an EU member state, a Schengen Area country, Australia, Bosnia and Herzegovina, Israel, Turkey, Canada, New Zealand, Russia, Serbia, the UK or the US. If a PCR test is performed in a country other than those listed above, it is deemed to be valid if it meets all of the following conditions:

- it contains at least the same data set as a PCR test issued in an EU member state or a Schengen Area country: name, surname, the person's unique identifier (personal identification number, health insurance number, number of passport or another document issued by that country, date of birth or other similar identifier), data on the test type (producer, date and time of taking the swab), data on the issuer of the certificate, and the date of the issuing of the certificate, and
- has a QR code in accordance with the standards and technological systems that are interoperable with the European Digital COVID Certificate System, and
- allows the authenticity, validity and integrity of the certificate to be verified in the same way as a European Digital COVID Certificate.

Regardless of the issuing country, a rapid antigen test is valid only if it is listed in the [on the common list of COVID-19 rapid antigen tests](#).

Proof of vaccination (referred to in point 4) may be:

- a filled-in card of the vaccine producer, or
- an entry in the vaccine booklet, or
- a certificate of vaccination (including a card issued upon vaccination).

Vaccinated persons can print out their vaccination certificate via the [zvem.eZdrav.si](#) portal (access with a digital certificate) or [smsPASS](#).

A vaccination certificate of a country with which Slovenia has not concluded an agreement or arrangement must contain at least the following information: name, surname, date of birth, personal identification number or health insurance number or other unique identifier, information on the type of vaccine (manufacturer, batch, dose number, date of vaccination) and information on the institution that issued the certificate or proof. The decree does not explicitly prescribe the language of certificates. In addition to certificates in Slovenian, valid certificates include those in the languages of the national minorities (Italian, Hungarian) in bilingual areas and the languages of countries recognised by mutual agreements or arrangements (Hungarian, Serbian). In order to avoid possible uncertainty at the border, we suggest that foreigners have their vaccination certificates translated into English or German.
